Costs and Charges Illustration for Robo-Advisor

This document aims to provide you with certain scenarios in order to illustrate how the costs and associated charges will impact your investment returns. Although these examples are based on actual incurred costs (or reasonable estimations of such costs) as a proxy for expected costs and charges, actual costs and charges incurred in respect of any future transaction may be different.

For simplification and ease of understanding, the calculations are based on the following assumptions:

- Client is able to add the following parameters based on which personalized scenarios are presented: initial investment amount, holding period, recurring investment per month, expected annual return, model portfolio’s annual total expense ratio (TER).
- Three scenarios based on expected annual income are presented:
 - First, where annual expected return (%) is 0%;
 - Second, where annual expected return is the one added by client;
 - Third, where the annual expected return is the one added by the client, just negative.
- All amounts are in EUR.
- For FX transactions above the FX exchange limits, a fee of 1% above the basic FX fee is charged for Standard plan customers and 0.5% for Plus plan customers.
