Costs and Charges Illustration for US listed stocks

This document aims to provide you with certain scenarios in order to illustrate how the costs and associated charges will impact your investment returns. Although these examples are based on actual incurred costs (or reasonable estimations of such costs) as a proxy for expected costs and charges, actual costs and charges incurred in respect of any future transaction may be different.

For simplification and ease of understanding, the calculations are based on the following assumptions:

- Client is able to add the following parameters based on which personalized scenarios are presented: subscription plan, initial investment amount, holding period, recurring investment, number of buy transactions per month, expected annual return.
- Three scenarios based on expected annual income are presented:
 - First, where annual expected return (%) is 0%;
 - Second, where annual expected return is the one added by client;
 - Third, where the annual expected return is the one added by the client, just negative.
- All amounts, including subscription plans are in EUR.
- The assumption is made that the client invests one lump-sum amount in the beginning and makes recurring payments on a specified amount in euro at the beginning of every month starting from the second month. Client is able to specify the number of recurring payments to be made during the month to understand the impact of commissions after commission-free trade limits.
- The assumption is made that the client executes 1 sell transaction (in addition to the recurring transaction made that month) at the end of the holding period to show the impact on costs of closing the position.
- For FX transactions above the FX exchange limits, a fee of 1% above the basic FX fee is charged for Standard plan customers and 0.5% for Plus plan customers.

Each Revolut customer has to choose a subscription plan - Revolut cannot be used without having a plan. Revolut offers 5 subscription plans, where each has a certain number of free transaction allowances. Table (1) summarises the monthly subscription fees, free transactions and FX exchange allowance.
