Fees for our payment processing products

The table below shows the fees we charge for our payment processing products. Fees are payable on all transactions and there is no free allowance.

Our fees are made up of two components; the variable fee which depends on the transaction value and the flat fee which depends on the Base Currency of your Account.

These fees apply regardless of the method you use to process the payment. For example, our fee for "Online Card Transactions" applies to all online card transactions,

in your own checkout, using Payment Pages, or otherwise.

The fees listed in the table below will apply unless we agree on a different arrangement with you.

Revolut Business features and apps

Access to business features and apps is subject to plan availability.

Some fees are only incurred for "active" team members. A team member becomes "active" when they start using a product feature or app (as set out in the table below) and remains active until their permission to use the feature or app is removed. You will be charged for any team members who have been active in the preceding billing period.

The fees listed in the table below will apply unless we agree on a different arrangement with you.

Type of Business app	Fees	
Expenses app	30 RON per active team member A team member becomes active after they've submitted their first expense.	
Payroll app	18 RON per active team member A team member becomes active after the Account Owner confirms that team member's first pay run per billing cycle.

	be lowered for certain clients

	0.8% of contract value
	Since the value of the FX Forward
	contracts are driven by market value,
	we may charge the mark to market

	negative) due to any potential loss we
	may have incurred because of your
	decision to close the contract early.

Exchanging money currencies

Your plan comes with the following free FX allowance. You will pay the stated fees if you exceed this allowance or if you exchange outside of foreign exchange market hours unless we agree on a different arrangement with you.

Foreign exchange	Allowance	Flat fee where allowance exceeded	Additional fees
Exchanging money currencies	Custom.	Custom.	1% if you're exchanging money outside of foreign exchange market hours

Whenever you make a money currency exchange using Revolut Business, we use our simple and transparent pricing formula of real rate + any fees (see the above table) = total cost.

We use the real exchange rate for money currency exchanges (sometimes called the "interbank" rate). Here at Revolut, the real exchange rate means the average buy and sell rates we have determined for each currency pair based on the foreign exchange market data feeds we consume from a range of different independent sources. This is a variable exchange rate.

The additional fees we may charge depend on the parameters of your exchange (like the time when you're exchanging currencies). You can see what these fees are in the app. They are also set out in the table above.

Billing Cycle

You will be billed for your plan fee monthly or yearly, depending on the choice you made when you signed up to your plan. All other fees will be billed monthly. Your billing cycle is monthly, beginning on the monthly anniversary of the day you signed up to your plan. Your allowances will reset each billing cycle. If you decide to change plan mid-billing cycle, your subscription will start again and your allowances will be reset according to your new plan immediately. We won't refund any of the monthly subscription you paid.

*Additional note about Cryptocurrency fees

This page shows the fees for the services provided to you by us, Revolut Bank UAB. The Cryptocurrency products are offered by our UK company, Revolut Ltd. You can see these fees here (scroll down to the bottom of the page).

This section applies from 19 August 2024:

Note: If a fee is stated in a currency other than the base currency of your account, it will be charged in your base currency. This conversion is made and fixed using an interbank exchange rate at the time each individual fee is set. This prevents fees fluctuating.
