

Below, you'll find a breakdown of all costs associated with using our platform.

1. Trading Fees

Our trading fees are composed of fixed rates and is subject to your plan.

Exchanging cryptocurrencies

Whenever you make a cryptocurrency exchange using Revolut Business, we use our simple and transparent pricing formula of rate + fee = total cost.

The exchange rate we use for crypto is calculated by taking the bid-ask spread that other crypto-asset exchanges and over-the-counter trading partners offer us and applying our own margin, as set out in our [Cryptocurrency Terms](#). You can always see the current crypto exchange rate in the Revolut Business app.

We charge a single, fixed fee for crypto conversions. This fee is 1.49% for the Basic plan, 0.99% for the Grow, Scale and Enterprise plans. We don't charge you any other fees for this service.

We will show you the rate, the fee, and the total cost in the Revolut Business app before you make any exchange.

2. Spread

When buying or selling crypto-assets, you might notice the ask rate (the highest price buyers are ready to pay) is usually higher than the bid rate (the lowest price sellers accept). This difference is called the spread.

The spread is composed of two components:

- **Market Spread**, which arises from the bid/ask difference available in the market. Market spread is a cost already included in the price quoted to you when you place an order and is not an additional fee added by us; and
- **Product Added Spread**, which is added by us to compensate for risk of exposures on our order book and us to provide value-added services, such as instant execution, a simplified trading experience, and access to a wide range of crypto assets.

When you buy or sell cryptocurrencies, spreads are included in the quoted price.

3. Deposits

We do not charge any fees for deposits.
