

Card transfer fees for Revolut Business

We'll charge you the following fees for transfers made from your Revolut Business account to a supported non-Revolut card.

All fees are priced in GBP (£), but you'll be charged in the currency of your transfer. We'll always show you the amount you're sending to the recipient, and the fees that we'll charge you in the app before you agree to the transfer.

We'll charge you 0.70% of each transfer made to recipients in countries in Group A or a minimum of GBP £0.20 (whichever is higher).

For transfers to recipients everywhere else, we'll charge you 1.50% of the transfer or a minimum fee of GBP £1.50 (whichever is higher).

We've set out some examples below to show you how the card transfer fee works in practice. Please remember, other fees (such as a foreign exchange fee) may also be applicable to your transfers.
