## Exchange

Whenever you make a currency exchange in the Revolut app or Revolut Dashboard, we'll use an exchange rate based on our market rate, which is based on foreign-exchange market rates. There is more information about our exchange rate in our [Business Terms](#).

For certain conversions we apply an extra percentage-based fee, which may change according to when and how frequently the currencies are traded. These fees are set out in the list below.

We charge a higher fee outside foreign-exchange-market hours because less currency is traded during these times. **Foreign-exchange-market hours are all hours except 5:00pm on Friday to 6:00pm on Sunday Eastern Time.**

## Pay All Transfer Fees feature (International Transfers and Non-USD Domestic Transfers Only)

The Pay All Transfer Fees Feature allows you to pay a flat upfront fee which is charged instead of the International Transfer fee that would otherwise apply. This feature is only available for transfers in the following currencies: USD, GBP, EUR, and CHF. Transfers made using this feature do not count toward your monthly allowance and are inclusive of any international transfer fee that may be charged by Revolut.
